

REFRIGERATED TRAILERS

COLD CORE MSC REFRIGERATED TRAILERS

*Less weight, more freight.
Superior thermal efficiency, lowest tare weights.*

Bruce Rock Engineering is the sole Australian distributor of Wabash National products, the largest trailer manufacturer in North America.

The partnership brings together BRE's renowned chassis and build quality with Wabash's Cold Core Moulded Structural Composite (MSC) technology to offer the most thermally efficient, light weight and strongest trailers in the Australian market.

The BRE Cold Core MSC range includes full length chassis semi-trailers and roll-back A-sections in various lengths from 10 pallet up to 26 pallet and temperature ratings as low as -30°C.

STANDARD FEATURES INCLUDE:

- Drum brake axles and airbag suspension, with options from BPW, SAF, K-Hitch and Hendrickson
- Bolt in king pin and bolt in ball race block
- Two-speed landing legs
- Dual spare tyre carrier
- Hella LED lights, wired to dangerous goods specification
- STRENX™ ultra high tensile auto fabricated chassis
- Optional road train hitch plate with air and electrical couplings
- Bolt on aluminum quarter guard and mud flaps or full radius guards
- Chassis abrasive blasted to class 2.5 epoxy primed and two pack top coated
- WABCO EBS braking system to current ADR 38
- Gloss gel coat finished, one piece moulded structural floor, roof, sides and front wall
- 100mm roof and floor insulation, and 40mm at the sides
- Knurled air flow duct or flat floor, 7.0t rated
- Stainless steel rear frame and docking bumper
- Barn doors with stainless hardware or overhead door
- Double loader options
- Multi temperature options
- Front wall prepared for Thermo King or Carrier TCU

REFRIGERATED TRAILERS

COLD CORE MSC REFRIGERATED TRAILERS

*Less weight, more freight.
Superior thermal efficiency, lowest tare weights.*

THE ROLL-BACK A-SECTION FEATURES:

- 12V hydraulic power pack with rack and pinion style drive, trickle charged from park light circuit
- Three air operated lock positions to body with eight sealer roller bearings

All Cold Core MSC trailers are available with different combinations of equipment and accessories such as tool boxes, water tanks, long range fuel, disc brake axles and Alcoa aluminium wheels.

PBS - PERFORMANCE BASED STANDARDS

BRE has embraced Performance Based Standards and the efficiency gains it can bring to a specific freight task.

We are the leaders in development of combinations that have allowed significant increases to payload, while also improving the on-road behaviour of the vehicle, resulting in an environmentally friendly, safe and efficient vehicle.
